### Result of June Promotion Examinations Chinook Consolidated School

(Grade VIII results will appear on diplomas which will be sent out by the Department of Education when promotions are accepted.)

### Grade VII. Promoted to Grade VIII:

Kathleen Proudfoot	88
Chester Rideout	75
Arthur Loader	74
Bilie McIntosh	67
Florence Marr	66
Earl Robinson, cond. Sp., and Gr.	55

### Grade VI. Promoted to Grade VII:

James Proudfoot	84
Robert Marcy	81
Helena Rosenau	80
Harold Dressel	80
Teddy DeMaere	79

### Grade V. Promoted to Grade VI:

Mary Schmidt	79
Gilbert Gilbertson	75
Evelyn Dawson	74
Johnny Lloyd, cond. arithmetic,	71
Gladys Coates	70

### Grade IV. Promoted to Grade V:

Walter Rosenau	70
Lorna Chapman, cond. acc.	69
Virginia Dressel	68
Norman Jacques, cond. geography,	67
Grade V. Promoted to Grade VI:	67

### Grade III. Promoted to Grade IV:

Siegfried Peters	85 8
Harry Funk	84 6
Jim Marcy	83 4
Eileen Proudfoot	79
Jack Lee	75 5

### Grade II. Promoted to Grade III:

Oakwald Guss	71 5
John Schmidt	70 5
Agnes Martens	69 8
Donald Guss	69 8
Joyce Milligan	67 6

### Grade I. Promoted to Grade II:

George Schmidt	66 7
Alice Gilbertson	64 1
William Hornmann	61 6
Grade IV. Promoted to Grade V:	61 6

### Grade III. Promoted to Grade IV:

Rodney Brodine	81 2
Edith Dawson	81
Peter Neufeld	80 8
George Marcy	78 5
Wilbert Myhre	78 4

### Grade II. Promoted to Grade III:

Liese Friesen	72 6
Maxine Hurley	72 4
Arthur Pfeifer	72 1
Andrew Rideout	68 4
Freda Hornmann	67 4

### Grade I. Promoted to Grade II:

Lester Barton	60 5
Grade III. Promoted to Grade IV:	60 5
Robert Proudfoot	93 3
Verna Murray	93 3
Jacob Friesen	87

### Grade II. Promoted to Grade III:

Peggy Lawrence	86 5
Annie Guss	82 8
Harold Rosenau	82 6
Freda Milligan	77 6
Annie Funk	77 3

### Grade I. Promoted to Grade II:

Grade II. Promoted to Grade III:	77 3
Irina Funk	94 4
Neta Schmidt	94
Helen Pfeifer	91
Henry Martens	90 6

### Grade I. Promoted to Grade II:

George Rosenau	90 6
Katy Schmidt	90 6
Gordon Marr	89 2
Welda Voth	87 6
Neta Friesen	85 2

### Grade I. Promoted to Grade II:

James Gilbertson	80 6
Amabel Mayers	79 4
Gerald Jacques	78 8
Grade I. Promoted to Grade II:	78 8

### Grade I. Promoted to Grade II:

Eldon Rideout	96 2
Harold Burton	96
Dorita Whelan	94 7
Lois Robinson	94 7
Patrick McIntosh	93

### Grade I. Promoted to Grade II:

Ross Guss	92 5
Helen Becker	92
Marjorie Johnston	91 5
Lionel Dressel	89 7
David Schmidt	86 2

## Rearville School Report

The Rearville school closed for the holidays on June 29. The report of the year's work is as follows:

Writing examination in Chinook:

Hilda Wilton	75
Raymond Osterberg	75
commended for promotion to Grade X:	75
Isabel Crawshaw	75 5
Agnes Bunney	67 8

### Promoted to Grade VII:

Harold Robinson	75 3
Phyllis Wilton	74 7
Promoted to Grade IV:	74
Majorie Robinson	64 2
Promoted to Grade II:	64

### Promoted to Grade II:

Stanley Wilton	73 5
Elbert Robinson, beginner, 70.	70
The prize winners were:	70
Phyllis Wilton, for proficiency in arithmetic and spelling.	70
Raymond Osterberg, for oral work on current events.	70

## Peyton School Report

The following are the results of the final examinations in Peyton school:

### Grade VII. Promoted to Grade VIII:

Grade 8. Ernest Petersen	75 7
Dorothy Robinson	73
Ruth Robinson	64
Promoted to Grade VIII:	64

### Grade VI. Promoted to Grade VII:

Grade 8. Ernest Petersen	75 3
Dorothy Robinson	73
Ruth Robinson	64
Promoted to Grade VII:	64

### Grade V. Promoted to Grade VI:

Grade 8. Ernest Petersen	75 3
Jean Huggard	60
Promoted to Grade V:	60

### Grade IV. Promoted to Grade V:

Grade 8. Ernest Petersen	75 3
Jack Shier	65 8
Promoted to Grade IV:	65
Grade 5. Jack Shier	65 8

### Grade III. Promoted to Grade IV:

Grade 5. Jack Shier	65 8
Promoted to Grade III:	65
Grade 4. Barbara Shier	77 3
Bruce Hutchison	74
Promoted to Grade 4:	74

### Grade II. Promoted to Grade III:

Grade 3.
----------

## FAIR SUCCESS ATTENDS LABORS AT LAUSANNE

Lausanne.—Despite the pessimistic atmosphere of the past few days, the League Conference looks like achieving a measure of success in its gigantic task of solving the reparations and inter-governmental debts tangle that has Europe on the verge of a crash.

"Although I am sorry to say I cannot report to you we have got a complete measure of agreement, we have got, I think, agreements," Prime Minister Ramsay MacDonald, the chairman, guardedly commented at a meeting of the six principal powers at the conference.

These are the points on which all the principal powers, including France and Germany have finally agreed:

(1) Adjustment of inter-governmental war debts and reparations should take place without delay in new disasters are to be avoided.

(2) Steps are necessary to ensure the stability of the German currency.

(3) The conference must end in something substantial and, so far as possible, final, although it is recognized a final settlement has to be adapted to a world settlement which includes the United States.

(4) The conference must end soon, and the settlement must be such as will render possible restoration of confidence.

(5) Artificial transfers disturbing the international balance of accounts should only take place—if at all—by the normal operation of international commerce and should be limited to that capacity.

(6) Germany cannot pay at the present time.

### Grasshopper Plague

Hope That Red Tick Would Abate  
Nuisance Has Proved To Be  
Unwarranted

Winnipeg, Man.—Hope that a tiny red tick, an attacker of grasshoppers, would aid Dominion and Manitoba agricultural departments in ridding the province's wheat belt of the worst grasshopper plague in 50 years, died today. The hoppers are too robust.

—Norman Criddle, head of the federal government laboratory at Treesbank, Man., said the little parasites attack adult grasshoppers and do "about as much damage as a tick on a dog." If they confined their activities to young hoppers they would be able to materially check the grasshopper advance, he said.

Government experts said the grasshopper outbreak in south Manitoba is the worst in the history of modern agriculture in western Canada, exceeded only by that which lasted from 1873 to 1875.

### Heavy Penalty For Fraud

Five Employees Of Stores In Moscow  
Sentenced To Death

Moscow, Russia.—Five employees of Moscow's state retail stores were sentenced to death after a six-day trial on charges of defrauding the state of 1,000,000 rubles (nominally \$60,000) by theft, illegal raising of prices and by supplying speculators.

Seven others were sentenced to ten years in prison and eight were sent to jail for three to five years. Three other defendants were acquitted.

Printing Jobs Go Abroad  
London, Ont.—Charging that \$80,000,000 worth of printing for Canadian firms was done outside Canada in 1931, the Ontario-Quebec Conference of Typographical Unions trained its guns against this alleged condition. They will ask the Canadian Manufacturers' Association and other employing organizations to condemn the practice. The printing for some companies was done in countries as far away as Sweden, it was claimed.

### Will Keep Present System

Calgary, Alberta.—Alberta wheat pool will continue operating this summer under its present marketing system. Pool officials decided not to hold a plebiscite this year among its membership "on alternate methods of marketing," the announcement said.

Presidential Election and Business  
New York.—A study of stock market averages compiled by Warren M. Persons, economist, goes a long way toward showing that periodic speculative nervousness in the United States because of the proverbial presidential year" has never been justified.

W. N. U. 1249

### Free State Senate Passes Oath Measure

But Bill Almost Unrecognizable On  
Account Of Amendments

Dublin, Ireland.—The Free State senate passed the Republican Government's bill to abolish the parliamentary oath of allegiance to the crown, but the measure has been amended so the bill is almost unrecognizable. As it stands, the abolition of the oath cannot be inserted in the constitution of the Free State.

"The government has no intention of accepting the measure in its present form," said Senator Joseph Connolly, Minister of Posts and Telegraphs. It would let the bill go to the Dail Eireann "with the results that might be expected," he added.

This means the Dail may again pass the original measure, which after 18 months would become law despite the senate. The alternative is a general election in which the Republican Government would seek a concise mandate for abolition of the Nationalist party.

### Deportation Case

Appeal To Supreme Court Of Canada  
Is Delayed

Halifax, N.S.—The appeal to the supreme court of Canada on behalf of alleged Communists held here for deportation will be held up at least a week while Mr. Justice Ross, of the supreme court of Nova Scotia, considers the application for leave. When formal motion was made recently by L. A. Ryan, counsel for a group of eight of the alleged Reds, C. B. Smith, K.C., representing the crown, appeared in opposition to the appeal. His lordship continued the application for a week, and intimated that he might hear further argument from Mr. Ryan.

The condemned men sought release under habeas corpus proceedings, but their action was dismissed by a supreme court judge and later by the full court of the Nova Scotia supreme court.

### Under New Regime

United Newfoundland Party Takes  
Over Reins Of Office

St. John's, Nfld.—This island dominion is now under control of the United Newfoundland party, with F. C. Alderdice, prominent St. John's business executive as prime minister.

The Liberal administration of Sir Richard Anderson Squires, unseated at the general elections of June 11, has resigned, and members of the new government were sworn in. Mr. Alderdice also took the portfolio of Minister of Finance and Customs.

Other members of the executive council are: J. C. Puddester, Secretary of State; L. E. Emerson, K.C., Minister of Justice; H. A. Winter, K.C., James Ayre, Hon. F. McNamee, S. J. Foot, Harold Mitchell, John Stone.

### Scalds Prove Fatal

Delegate From Vancouver Attending  
Orange Gathering In Montreal,  
Dies From Injuries

Montreal, Que.—John E. Carpenter of Vancouver, died in hospital here from injuries sustained when he was scalded in his hotel bathroom. He was believed to have been overcome by a seizure while drawing water for his bath and fallen into the water. He was 75 years of age.

Mr. Carpenter was in Montreal to attend proceedings of the grand lodge of British North America, of the Orange Order. Monday he was elected deputy grand master of the Black Knights. He was a past grand master of the order in British Columbia.

### Opposition For Bracken

May Be Three-Cornered Fight At The  
Pas

Winnipeg, Man.—Premier John Bracken may have two opponents in the deferred election in The Pas on July 14. J. A. Campbell, Conservative, is to be nominated as a candidate for the seat and the Independent Labor Party moved to place a third man in the field. Rupert's Land also will elect a member on July 14. H. G. Beresford, government member in the last House, will run as a Bracken follower, and probably will be opposed by Col. Arthur Sullivan, Winnipeg lawyer.

Heads National Council Of Women  
Ottawa, Ont.—Miss M. Winnifred Kydd, of Montreal, Canadian delegate to the Geneva disarmament conference, was re-elected unanimously to the presidency of the National Council of Women at the meeting held here. Mrs. C. R. Townley, Vancouver, was appointed convenor of the national recreation committee.

### To Tour Canada

Group Of Empire Farmers On Visit  
To Dominion

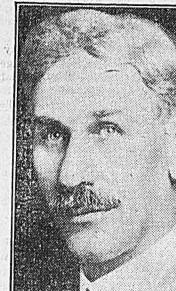

Quebec, Que.—"To see and to learn" might be the motto of the group of empire farmers who arrived here on the liner "Empress of Australia." They spent two days in Quebec prior to starting on a trans-Canada tour.

Thirty-seven in number and including 13 women, members of the party are all farmers or closely connected with farming, and represent the mother country, South Africa and Irish Free State. They are travelling under auspices of the British National Union accompanied by Arthur Chamberlain, Secretary of the Union and former South African Trade Commissioner to Great Britain.

The party is composed of 12 members from all parts of South Africa, two from the Irish Free State and the remainder from England and Scotland. Among them are Daniel Crawford, former treasurer of the National Farmers' Union of England, and M. G. Viljoen, of Cape Province, South Africa, a former candidate of the Nationalist party.

Hon. Peter Heenan, former Liberal Minister of Labor, is going back to

### DONS OVERALLS

oversalls as a locomotive driver and hopes to take the throttle this week. "It is my trade, and a good one," he said. "Besides, I have a family to support."

### Judgment Reserved

Supreme Court Deals With Peter  
Verigin Case

Ottawa Lumberman Awarded Full  
Amount Of Claim Against  
Brokers

Toronto, Ont.—In a judgment of far-reaching importance to brokerage houses D. B. Rochester, Ottawa lumberman, is awarded the full amount of his claim, \$162,168.35, against I. W. C. Solloway, Harvey Mills and the Solloway-Mills Brokerage Companies by O. E. Lemmon, assistant master at Osgoode Hall.

Rochester, who dealt with the brokerage firm for more than two years, is, by this judgment, returned every dollar he ever invested with Solloway, Mills and Co. He is also allowed interest at five per cent. from December 19, 1929.

### FARM MARKETING BOARD MAY BE APPOINTED SOON

Ottawa, Ont.—A commission to study and report on the feasibility of a farm marketing board will be appointed by the Dominion Government in a few days it was learned here. It is reported that during his recent visit to the west Hon. Robert Weir, Minister of Agriculture, went into the matter with western producers and dealers and that considerable progress has been made towards reaching a decision as to the men who should form the commission.

It is planned that the commission

will begin very soon to study the situation in order to be in a position to discuss the feasibility of a marketing board with exporters from other dominions who will be here for the Imperial Conference. The object of a board would be to avoid slumps in prices whenever Canada went on an export basis on such products as butter, bacon and other commodities in which the exportable surplus is small compared with the domestic demand.

### Prospectors Use 'Plane

Flying Box-Car" Carries Equipment  
To Northern Gold Fields

Lac Du Bonnet, Man.—Prospecting in Manitoba entered upon a new phase when ten prospectors with 6,000 pounds of supplies, equipment and five canoes, left here in one aeroplane for the Island Lake gold field, 200 miles north and on the Manitoba-North Dakota boundary.

Their sky chariot was the huge Junkers of the Canadian Airways, the "Flying Box-Car."

The machine was chartered by the Manitoba Chamber of Mines with the result that the ten prospectors can get into the field at a cost of about \$60 each, including equipment.

### New Plans For India

London, England.—A comprehensive scheme for the future constitution of India, embodying both the aspects of federation and provincial autonomy, will be presented in a bill to be brought down in parliament by the British Government, Sir Samuel Hoare, Secretary for India, announced.

### Crop Conditions

Improvement In Western Provinces Is  
Indicated In Government Report

Ottawa, Ont.—Canadian crop conditions are much improved in the western provinces and distinctly lower in the maritimes and eastern Canada, as compared with last year. This statement is made in the government report on crop conditions issued June 28.

Western crops have maintained their condition fairly well, the report states, in a period of spotty rainfall and higher temperature. Likelihood of heavy damage from cutworms is now past but grasshoppers are still dangerous and are particularly damaging in Manitoba.

In some large areas rain is needed to prevent crop deterioration, but generally the present moisture supplies are satisfactory.

In British Columbia, recent weather has been almost ideal with plenty of heat and rain. Haying is nearly completed. Cereal crops are looking fine.

### Staging Wrigley Swim At Lake Waskesiu

All Entrants In Saskatchewan Event  
Must Be Amateurs

Saskatoon, Sask.—Permit has been granted to the Prince Albert Aquatic Club to stage the Saskatchewan Wrigley one-mile championship swims at Lake Waskesiu, Prince Albert National Park, Saturday, July 16.

In 1931 the Wm. Wrigley, Jr. Company, of Winnipeg, presented for an annual competition two large challenge trophies for the men's and women's provincial mile swimming championships. Two members of the Moose Jaw Aquatic Club, Percy Reynolds and Phyllis Dewar were the 1931 winners.

All entrants must be amateurs and should apply to William Schon, of the Saskatchewan pool elevators, Prince Albert, for entry forms.

### Statues On Parliament Hill

Burnishing Up Statues At Ottawa  
For Imperial Conference

Ottawa, Ont.—Releaved of their mantles of green corrosion, statues on Parliament Hill of Queen Victoria and Sir John A. Macdonald will greet delegates to the Imperial Conference, resplendent in experimental coats of varnish.

After months of work, national research council chemists prepared a solution to remove the marring corrosion. The varnish was applied in an attempt to prevent its recurrence.

### Retiring Ages Set

## DEMOCRATS WILL FAVOR REPEAL OF VOLSTEAD ACT

Chicago Stadium.—A plank putting the party on record for repeal of the 18th amendment and for immediate modification of the Volstead law was adopted by the United States Democratic National Convention.

Other high points of the 1932 Democratic pronouncement of policies included:

Refinancing farm mortgages; extension of co-operative marketing; effective control of crop surpluses; and endorsement of "every constitutional measure" to help farmers to get cost of production.

Regulation of interstate utility companies and stock exchanges.

Freest generosity for all war veterans, but no mention of the cash bonus.

Condemnation of the Hawley-Smoot Tariff Act and of "extravagance" by the Federal Reserve.

A real contest developed in the committee against the tariff plank with opposition to the proposal of a "competitive tariff for revenue."

### New Source Of Wealth

Investigate Possibilities Of White  
Whale Fisheries In Hudson Bay

Winnipeg, Man.—A new source of wealth from the Hudson Bay is to be developed under the auspices of the Manitoba Industrial Development Board. The sub-committee on fish by-products will bring six white whales here from the bay for sampling.

The committee has come to the conclusion there is a potential Canadian market for oil, meat and leather from the aquatic animals, and an overseas market is also thought to exist for certain of the oils which could be profitably exported through Hudson Bay. After preliminary tests of the product are completed, samples will be sent to England, and a survey of the European market will be made by a representative of a Winnipeg firm.

A. Cunningham, director of game and fisheries, who is chairman of the committee, hopes ultimately to see the establishment of a rendering plant at Churchill, sea port on Hudson Bay.

### New Ruling Applies To Members Of Royal Canadian Mounted Police

Ottawa, Ont.—For the first time since organization of the Royal Canadian Mounted Police, retiring ages for all members have been set by order-in-council.

The order places the retiring age of the commissioner at 65 years; deputy commissioner, 64; assistant commissioners, 63; superintendents, 62, and inspectors, 60.

For the sergeant-major, the retiring age is 57 years; staff sergeants and sergeants, 58, and other ranks, 56.

The order goes into effect immediately, but there are few, if any, members of the force who have reached the retiring age.

### Send Up Test Balloons

Altitude Of 65,000 Feet Is Attained In  
German Experiment

Stuttgart, Germany.—Three test balloons carrying measuring instruments were sent up 65,000 feet under the direction of Prof. Erich Regener, of the Technical University. The altitude was greater than that attained last year by Prof. August Piccard in his ascent to the stratosphere.

Each balloon was 6½ feet in diameter and the three were hatched together 13 feet apart with the instruments in a gondola between them. They were hauled down after three hours.

### Papal Legate Visits Belfast

Belfast, Northern Ireland.—No unauthorized incidents marked the visit here of Cardinal Lau, papal legate at the Eucharistic Congress. It was through a quarter mostly inhabited by Nationalists that the prelate entered Ireland's ecclesiastical capital. The route was diverted so a Union district.

### Sets Flight Record

Vancouver, B.C.—Making the flight from Winnipeg to Vancouver in one day, Pat Reid, noted Canadian pilot, landed at Sea Island airport. He stopped at Regina, Lethbridge and Grand Forks en route, and averaged 100 miles an hour.

Queen Helena of Italy, on one of the very rare occasions on which they have been photographed together. The picture was made during the recent services to commemorate the fiftieth anniversary of Garibaldi's death in Rome. A monument to the wife of the national hero was unveiled at the Gianicolo as a feature of the celebrations.

## Jack Miner Foundation

### Raising Funds To Perpetuate Bird Sanctuary At Kingsville, Ont.

Every person who has visited the Jack Miner Bird Sanctuary or read of it and its accomplishments, naturally wonders—"what will become of the place when Jack Miner is no more?" However, every citizen of Canada and the United States will be pleased to learn through the columns of this paper that there has sprung into existence what is known as "The Jack Miner Migratory Bird Foundation, Inc." This organization has entered into a trusted agreement with Toronto General Trust to accept contributions and bequests for the purpose of perpetuating the Jack Miner Sanctuary, so that monies from said trust fund will always be available both during the balance of Jack Miner's natural life, and after he turns his property over to such an organization.

Are you interested in seeing your money carry on this sanctuary, and this line of work here in Canada, started by Jack Miner? If so it is up to you to contribute or remember same in your will, or both. Will you do it?

### Largest Horse In World

#### Ten-Hande Hight and Weighs Ton and Half

Weighing 2,600 pounds, a mere ton and a half, "Silon B." pure white and perfectly formed, is probably the largest horse in existence. And he is still growing according to his owner, Clarence H. Van Wickle, Waterloo, N.Y. Reports of the largest elephant and other animals have been announced from time to time but this is believed to be the first claim to the world's heavyweight equine title. The horse is not 12 years old and has outgrown his famous full brother, "Silon," of an exactly opposite hue, now dead. Truly a mountain of horse flesh is this pride of the Van Wickle farm, 21 hands high, the tips of its ears being nine feet from the ground in natural posture. Average-sized horses look like ponies beside him. Around the girth "Silon B." measures eight feet ten inches.

Five stalls were required to give him solid comfort during his growing time which his owner says is not over yet. Temperamental as a prima donna he likes to be fussed over with a comb and brush. He was imported from France.—*St. Thomas Journal*.

### Robot May Prevent Panics

#### Science Has Produced Mechanical Counterpart Of Cool Headed Person

A robot, mechanical counterpart of the cool headed person whose calm voice directs less collected folk to safety in time of fire, has been introduced to the world of science through engineers of the Northern Electric Company. The new contrivance, operated by electricity, was designed to remove the panic hazard from theatres, halls and schools. As soon as a fire starts, and before the acrid fumes of smoke have even gone through the building, the robot whirs to life. "There is a fire emergency, but no immediate danger," booms a calm but commanding voice through concealed loudspeakers. "You must leave the building. Leave your hats and coats and take your place in line. Steady now, don't rush. Follow the great arrows."

### May Be Wrongly Blamed

#### Dime Novel Not Likely To Lead Boys Into Trouble

Once again, dime novels are being blamed for leading boys into trouble. A fourteen-year-old lad who committed several burglaries at Seaforth, Ontario, "addicted to reading dime novels," a despatch says, and this prediction is alleged to be responsible for his burglarious acts.

Frankly, we regard this as so much nonsense. All those who have ever read a genuine dime novel know perfectly well that there never was one book of the kind written yet in which virtue was not wholly and triumphantly victorious.

Villainy was never painted blacker, nor never vanquished with such thoroughness as it was in those gaudy-covered thrillers, which were read surreptitiously in the hay-loft, or between the covers of some more dignified tome.—*Guelph Mercury*.

#### Sorry She Asked

They were visiting friends one evening. Presently their three-year-old son became restless. The hostess, noticing this, gave him a soft rubber ball to play with. During the course of his play the ball rolled under the davenport, and the little fellow crawled in after it. Presently the hostess asked him if he saw the ball.

He replied, "No." "Then why don't you come out?" "I'm drawing pictures on the floor."

The poison in poison ivy is not the poison but a kind of resin in the stem and leaves.

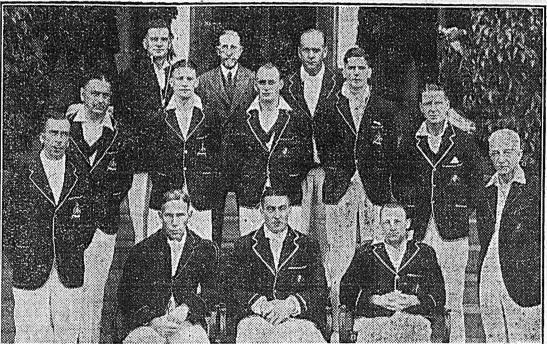

W. N. U. 1919

as originally intended, and that money is not in any way spent injudiciously, and proper investments are made in non-taxable Government bonds.

With the Miner family planning to turn the Jack Miner Sanctuary over to "The Jack Miner Migratory Bird Foundation, Inc." one and all can rest assured that Jack Miner saw to it that there were no weak spots in the legal set-up of the incorporation, and he welcomes lawyers or judges to investigate the proposition for any interested person, because, if there are any weak spots in it Jack Miner wants to learn of them now, so they can be corrected while he is in the land of the living, and before he turns his property over to such an organization.

Are you interested in seeing your money carry on this sanctuary, and this line of work here in Canada, started by Jack Miner? If so it is up to you to contribute or remember same in your will, or both. Will you do it?

## AUSTRALIAN CRICKETERS COMMENCE CANADIAN TOUR AT VICTORIA

"The wonder team of cricket" is what experts are calling this all-star group of Australian cricketers photographed at the Empress Hotel, Victoria, B.C., shortly after their arrival on the R.M.A. Niagara from Sydney. Opening their Canadian tour against a picked Vancouver Island side, the visitors from "down under" scored 503 runs for eight wickets, all in a little more than two hours. The team, in this group, is as follows: Seated, left to right: Arthur Malley, manager; Vic Richardson, Captain; Don Bradman. Second Row: P. Carney, E. Rofo, S. McCabro, L. Fleetwood-Smith, Alan Kippax and Hanson Carter. Back Row: W. F. Ives, Dr. R. J. Pope, team physician, and Keith Tohurst.

Jack Miner plans, as soon as the public has contributed sufficient money to finance the upkeep of the property in perpetuity, that he will turn his part over to the Jack Miner Sanctuary to "The Jack Miner Migratory Bird Foundation, Inc.; and at the death of present trustees, he has named the Premier of Canada and the President of the United States to be a committee of two to name their successors.

If you have been interested in the work Jack Miner has been carrying on, at practically his own expense, what better living monument do you think the wealth of America can be devoted to than to let Jack Miner see, while he is still in the land of the living, that people of the continent appreciate his work, by contributing and remembering the Jack Miner Foundation, not only now but in their last will and testament or by a codicil to your will?

Provost has been made where Foundation can accept gifts in any form such as cash, stocks, bonds, buildings or real estate, and the income from same to be used for upkeep, feed, and to otherwise care for the bird sanctuary.

Provost has also been made whereby one can endow his or her own farm and country estate and leave same to "The Jack Miner Migratory Bird Foundation, Inc." and have it turned into a bird sanctuary with its upkeep guaranteed to the extent that it has been endowed by contributor.

Jack Miner says, "The hope of the world is more love and education and less bayonet-point compulsion," and for the last few years he has concentrated on getting children to build and erect bird houses. For anyone who only wishes his contribution to be used for educational purposes a clause has been added to Foundation agreement, whereby a contributor can leave money to "The Jack Miner Migratory Bird Foundation, Inc." to be used along educational lines in schools to educate youth to the value of bird life in the country; but contributor must specify in writing that same must be used by Foundation for educational purposes, because the chief reason for establishing the Foundation is to raise funds by gifts, contributions or bequests to maintain the said Jack Miner Bird Sanctuary.

In the United States the Union Guardian Trust Co., of Detroit, has been named the depository for all contributions made by United States citizens, and the public will be glad to learn that citizens in the country to the south of us are already doing their part, and it is hoped that people here in Canada, where sanctuary is located, will do their best, if not now, that they will remember the sanctuary in their wills in the form of a bequest.

There is an Advisory Board of some seventy-five men and women who have personally allowed their names to appear in connection with the Foundation. They not only say they endorse the plan, but it will be compulsory to render to this advisory board annual statements along with the names of contributors in order to ensure that the Foundation functions

#### Between Sailors

"Jones is suffering with his liver." "Where does the liver be?" "South of the lungs."—*Sondages-Mise-Strix, Stockholm*.

### A Famous War Song

#### "Mademoiselle From Armentières" Inspired by French Girl

The true story of a little French girl who slapped a general's face and thus inspired the famous war song "Mademoiselle From Armentières" is related by Mr. Zo Elliott, the American composer, who is making a study of war songs for his operatic version "What Price Glory?"

The song was inspired by a certain French girl in Armentières during the early part of the war," he says. "The girl was nearer 20 than 40, and was as virtuous as she was pretty. She was employed in the *Cafe Pas de Calais*."

"While the troops rested in Armentières permission was granted to hold entertainments behind the lines. A London music hall actor, Red Roland, and the Canadian song-writer, Lieutenant Gitz-Rice, who later composed "Dana Old Fol' Mine," took charge of the show. They wanted to introduce a topical song, and decided to use the music of a French folk-song which may have been called "Mademoiselle de Harle-Duc."

"At the time they were planning the show a Canadian general came to Armentières, and was attracted by the cafe waitress. Disregarding advice, he attempted to kiss her. She slapped his face in front of his staff. The story quickly spread, and Gitz-Rice and Roland thought it would make a hit in their show. So they changed the folk song, and fitted it with the words "The General's in an awful fix." When they had finished singing the verse someone warned them that the general was not the only one who would be in a fix if it was sung. Accordingly they decided to make the girl the heroine and wrote a stanza about the undesirable Mademoiselle.

The song immediately caught on, and soon millions of men were marching to the tune. What has become of her is unknown, and the *Cafe Pas de Calais* itself has disappeared."

A gold brick from the Cryderman Mine, in Manitoba, was shipped to Winnipeg by airplane some weeks ago, en route to the Mint, at Ottawa. This is Manitoba's newest gold producer. It has a 50-ton mill and a crew of 35 men.

A gold brick from the Cryderman Mine, in Manitoba, was shipped to Winnipeg by airplane some weeks ago, en route to the Mint, at Ottawa. This is Manitoba's newest gold producer. It has a 50-ton mill and a crew of 35 men.

Manitoba had 165,000 sheep at the end of last year, Saskatchewan had 209,000 and Alberta, 614,000. Total 983,000.

Manitoba has appropriated nearly \$3,500,000 to aid its farmers.

England will prosecute killers of eagles.

### Former King Loses Fortune

#### Alfonso's Wealth Taken Over By Spanish Republic Treasury

Former King Alfonso's private fortune was declared confiscated by the director of the Spanish republic treasury.

The fortune included more than \$2,500,000 in cash and securities, as well as other possessions valued at more than \$500,000.

The money and bonds would be available to the public treasury and the immovable property would belong to the state, the director said. He revealed that 21,000,000 pesetas (about \$1,700,000) worth of seized property had not belonged to the deposed king, but to societies over which he presided.

With a strong box taken from the Royal Palace, were found 150,000 pesetas in bank notes, 6,800,000 pesetas in bonds of private companies, and 11,500,000 pesetas in other securities.

The box also yielded a gold key given to Queen Isabella II by the people of Andalusia and another given by the people of Cadiz; five solid gold dollars of the Order of Tolosa de Oro, seals and jewelled cases. The seized property also included furniture, some of which, the treasury director said would go to schools and the rest to museums.

At the time they were planning the show a Canadian general came to Armentières, and was attracted by the cafe waitress. Disregarding advice, he attempted to kiss her. She slapped his face in front of his staff. The story quickly spread, and Gitz-Rice and Roland thought it would make a hit in their show. So they changed the folk song, and fitted it with the words "The General's in an awful fix." When they had finished singing the verse someone warned them that the general was not the only one who would be in a fix if it was sung. Accordingly they decided to make the girl the heroine and wrote a stanza about the undesirable Mademoiselle.

The song immediately caught on, and soon millions of men were marching to the tune. What has become of her is unknown, and the *Cafe Pas de Calais* itself has disappeared."

### Deer In British Parks

#### Private Owners Finding It Difficult To Maintain Herds

In British parks there are more than 7,500 deer, and it is said to learn, on good authority that many private owners are finding it very difficult to maintain their herds owing to high taxation.

The oldest herd in the country is believed to be that owned by a Mrs. Smyth at Long Ashton in Somerset. It is known to have existed in 1892.

The biggest herd is owned by the King. There are 819 in the herd in Windsor Great Park; and on the royal estate at Sandringham is another with 150 animals.

There are 46 herds registered with the Deer Herd Book Society.

Londoners are familiar with the beautiful creatures in Richmond Park; and in Epping Forest many fallow deer and a few roe deer run wild.

These deer are more or less tame and accustomed to the sight of human beings.

There are still thousands of wild deer to afford sport to hunters in Scotland, and in parts of Wales.

### Ancient and Modern

#### Contrast In Engineering Seen In Roads Of Arizona Desert

Two roads running side by side across the desert near Yuma, Arizona, furnish a contrast between the old and new in engineering. The old wooden road is being obliterated by drifting sands. It was used many years ago by wagons which made the long, hot trip across the Arizona deserts of California. A new concrete highway has been designed to be almost impervious to the assaults of nature. Whereas the old road was laid directly on the floor of the desert, the new one has been built upon an embankment raised to a height sufficient to insure it against being covered by wind-blown sand.

Island Expropriated

Government Takes Over Pier Island As Home For Doukhobors

"Pier Island, in the Gulf of Georgia, the 250-acre new home of the Doukhobor prisoners serving three years sentences for nude parades, is being expropriated for complete ownership by the Dominion Government."

C. J. S. Harvey, owner, was notified the island had been seized under the Expropriation Act by the Dominion Government for public purposes.

The price to be paid under the Act is now being arranged by the proper authorities.

### Queer Trade For Girl

Corolla Peste, Columbus, Ohio, has a mind of her own, so when she got the idea that she wanted to follow in the footsteps of her father and three brothers and become a butcher, she did so. Now she works in her father's shop every day, sharpens her own knives. What is more, she cuts out clothes herself.

### Had the "Clipping" Hobby

Clipping stories of interest from newspapers has been a habit of Jules Bourassa, retired accountant of Montreal, since he was a boy. Now his library contains a unique collection of scrapbooks numbering over 900 volumes, which he is anxious to place in some institution where it will be available to the public.

Bulgaria now has 45 talkie theatres, and others are being wired for sound films.

Sweden now has 160,000 registered vehicles.

"Don't talk to me about lawyers, my dear. I've had so much trouble over the property that I sometimes wish my husband hadn't died!"

## FANCIFUL FABLES

## Good Progress Being Made In Extraction Of Radium From Great Bear Lake Pitchblende

Investigation into the treatment of the Great Bear Lake pitchblende ore is now being actively carried on by the Ore Testing Division of the Mines Branch, Department of Mines, Ottawa, under Mr. W. B. Timm, Chief of the Division. It is learned that progress is very satisfactory, and remarkable headway has been made considering the nature of the investigation and the small staff available for the work.

After preliminary investigation of all the known processes, Mr. Timm states, work was confined during February and March to one which seemed to be the most adaptable to the treatment of this particular ore. Now, the investigation has progressed from small laboratory scale work to pilot-plant scale, and some six trial runs have given encouraging results. The pilot-plant scale on which work is being conducted is approximately one-tenth the size of an ordinary commercial unit, calculated to give all the data with respect to operation and costs of a full size unit.

Extractions of radium from the ore have been well over 99 per cent, the last test made giving 97.98 per cent. This, however, is on one type of ore and, as the process is entirely a chemical one, other types may require variations in treatment and may not give such good results. No results, therefore, can be released for publication until all types of ore from the property have been thoroughly tested, and a satisfactory treatment worked out which can be embodied in a commercial treatment plant.

For some years only high grade pitchblende will be shipped from the Great Bear Lake property, i.e., ore containing above 40 per cent. uranium oxide. Later, the cobbled rejects and low grade ore will, no doubt, be concentrated at the mine to shipping grade, and the treatment plant will be erected in the most favourable position from the standpoint of the cost of chemicals. As it takes three tons or more of acid to the ton of ore, the advantage of shipping the ore to the supply of chemicals will be readily seen.

Lest there be any misunderstanding as to the meaning of the word concentration when spoken of in the treatment of pitchblende ore for the extraction of radium, it should be pointed out that the concentration of the radium is distinct from the concentration of the pitchblende in the ore. The latter will, no doubt, be done at the mine when it becomes necessary to carry out this operation.

The concentration of the radium is that of the chemical process in which the radium in solution is precipitated with barium, resulting in a radium-barium sulphate concentrate.

Those unacquainted with the topography and general characteristics of the Great Bear Lake territory, may be interested to know that the lake itself is the largest one contained entirely within Canadian boundaries, and the fourth largest on the North American continent. Its area, according to present surveys, is 11,663 square miles, compared with 31,810 square miles for Lake Superior, 23,010 for Lake Huron, 22,400 for Lake Michigan, and 11,170 for Great Slave Lake. Its greatest length is 198 miles and its width about 116 miles. Its elevation has not yet been accurately measured, but it is approximately 390 feet above mean sea level. Its depth varies up to 75 fathoms, or 450 feet, placing its floor below sea level.

Great Bear Lake has long been known through the descriptions left by early explorers, particularly Franklin, Dease and Simpson, who made this lake their headquarters in the exploration and mapping of the Arctic Coast, but it is only recently that the area surrounding it has become of economic importance. In 1920, oil was discovered on the MacKenzie River in the vicinity of Norman, where Great Bear River discharges the waters of the lake. This

area has been forgotten to stamp the letters."

Boys: "What idiots we are!"—Buen Humor, Madrid.

Chief: "We have forgotten to stamp the letters."

Boys: "What idiots we are!"—Buen Humor, Madrid.

discovery well, and subsequent wells drilled in 1921 and 1922, were capped and left for development when conditions are economically favourable. The oil has produced, experimentally, a high grade gasoline. In 1923 output of coal were reported to exist at Douglas Bay on Great Bear Lake. From 1926 to 1928 biologists of the Department of the Interior made investigations over a large part of the Northwest Territories in search of grazing lands for reindeer. One of the areas found to be most suitable for the purpose lies immediately north of Great Bear Lake.

### New Source Of Rayon

#### Discovery Regarding Waste From Sugar Cane Is Important

Sugar cane waste has been turned into a new source of rayon—a silky dress material for women. Chemists have succeeded in developing a process by which high-grade cellulose, the base material for rayon, is produced from bagasse, the waste from sugar cane after the sugar has been extracted. The discovery is regarded as important as most rayon manufacturers depend upon wood pulp for cellulose. Sugar cane mills accumulate between 250,000 and 500,000 tons of bagasse annually. Much of this material has been used in manufacturing insulating building material. Other quantities have been used as fuel in the mills.

### New Industry In Alberta

#### Factory Turns Out Potato Chips and Potato Waffles

A new industry has been launched in Lethbridge, Alberta, the output of which will be potato chips and potato waffles. The latest models in machinery are used and the prospects are that large quantities of local grown potatoes will find a market. The utmost care is taken in handling the potato chips which will be retailed in attractive, dust-proof containers. If the Lethbridge product proves popular the factory and its products will be extended.

Potato chips are a popular and nutritive food product in the States where similar factories have been established.

### Floral Barometer Is Unique

#### One In Victoria Park, London, Ontario Is Accurate Under Test

A floral barometer has been laid out in Victoria Park, London, Ont., and under test it worked. It is believed to be unique among flower beds of Canada. It records accurately each day the barometric pressure and forecasts change in weather. It has two floral hours, one stationary, and the other moving. The words "stormy," "rain," "change," "fair and dry" are on the outer edge in contrasting colored plants. The pressure numbers from 26 to 31, inclusive, are also shown in floral design.

### Elik Island Animal Park

Elik Island National Park, Canada's second largest animal reserve, is within an hour's motor ride of Edmonton, Alberta. The buffalo in Elik Island Park are unusually fine specimens of their kind. The pelage is particularly dark and thick and the animals are all sturdy and well developed. They are not as wild as when they were originally captured, but it is inadvisable for visitors to go near them on foot, though they may be approached with safety in an automobile.

Both the moose and elk in this sanctuary are also well developed specimens.

### Could Guess Again

Shront stopped his motor car at a desolate crossroads and yelled to a farmer who lay on a cart of fertilizer: "Hey, Cornsilk, is this the way to Croydon?"

The farmer raised himself from the fertilizer in astonishment. "By heck, stranger, how did you know my name is Cornsilk?" he asked.

"I guessed it," said the motorist.

"Then, by heck," said the farmer as he drove on, "guess your way to Croydon."

### When Time Flies

The advance of age is at first unperceived, but is nevertheless certain and rapid; and when it is realized, it seems to approach almost with speed of light, and life at last seems to end soon after its commencement.

Tea leaves are plucked from a plant every seven or eight days.

### Control of Tuberculosis

#### Medical Profession Claims Disease Can Be Eradicated in Civilized Communities

Dr. Norman Bethune of the Royal Victoria hospital, Montreal, told interviewers recent developments in treatment of tuberculosis have convinced the medical profession the disease could be entirely eradicated in civilized communities where proper methods of control were applied.

Dr. Bethune said latest forms of treatment have refuted the previously held opinion that climate was a factor in the disease. It is no longer necessary, he said, for persons suffering from tuberculosis of the lung to take long trips in search of sunshiny dry air.

Tuberculosis, he continued, is positively curable in cases where it is detected early and even in cases where it has made considerable progress.

Recently developed method of collapsing the affected lung by filling the chest wall with air pumped in through a hollow needle has been improved by technique for elimination of adhesions of the lung to the ribs or chest wall, he said.

### Holiday Spoiled For New York Visitors

#### Found June Not Good Time for Skiing in Quebec

The green garb of summer may be a delight to some of Quebec's visitors but it was a pain in the neck to four young women from a small New York town. Blushing with humiliation and smarting under the ill-concealed laughter and grin of Quebec, the four vacation girls did their best to hide three pairs of brand new skis they brought up with them. Natty winter sports costumes would not see the light of day either.

Appropriately equipped for two weeks in the bracing northern air of Canada, when the girls got a nasty shock they were ushered into a countryside nodding drowsily under a warm summer sun.

### Defends Legion

#### President of Ontario Command Takes Issue With Published Reports

Taking strong issue with published reports alleging existence of "ramifications of fraud" in connection with pensions, Col. F. J. Pickling, of Toronto, president of the Ontario command of the Canadian Legion, declared the impression was given many men secured pensions by misrepresentation.

He told district members of the Legion the fraud allegations were made public "in a manner calculated to bring into disrepute ex-soldier citizens and their organizations."

### Alberta Wheat Pool

#### Decision Made to Continue Under Present Marketing System

Alberta wheat pool will continue operating this summer under its present marketing system, it was announced at Calgary.

Pool officials decided not to hold a plebiscite this year among its members "on alternate methods of marketing," the announcement said. In a resolution passed at the annual meeting of the pool last fall it was suggested such a plebiscite be held. Directors, however, decided it was inadvisable to hold the vote at present.

Exportation of currency and necessary papers without permit has been prohibited in Uruguay.

### Anglo-American Alliance

A recent wedding of interest to society on both sides of the Atlantic was that of A. F. Stanley-Clarke, of the 14th and 20th Hussars, crack British regiment, and Miss Vivien St. George, prominent New York society belle. The newly-weds are shown as they left St. Mary Abbots' Church, London, England, after the ceremony. The bride is a sister of the well known New York clubman.

#### Airplane Directed By Train Passengers

#### Successful Experiment Conducted From "Flying Scotsman"

Passengers travelling from London to Glasgow on the crack train, "The Flying Scotsman," at a speed of nine miles an hour directed by radio phone the movements of a forty-passenger airliner "Hercules," flying overhead.

Pilot O. B. Jones turned the machine whenever requested, while several of his passengers spoke with persons aboard the train.

This is believed to have been the first two-way conversation between an airplane and a train. An aerial was hung inside the observation car, as there was not sufficient clearance on the roof when the train passed under bridges.

It is hoped to take quite a lot of pictures of moose and their families, but if I should see an exceptionally fine animal, I may try to bag him, if the season is open," declared the tall, slender woman, who looks more like a schoolgirl than a woman who has been hunting since 1918.

Baroness Buffin declared that she had not had a single close escape, and that adventure had not yet come her way.

### Riding Mountain National Park, Manitoba's Scenic Playground, Has Attractions For Tourists

#### Works In a Circle

#### Great Trouble In That Employment Creates Unemployment

Great earnings of Canadian railways for March totalled \$25,000,000, as against \$30,000,000 for March of last year. But as operating expenses in March, 1931, were but \$22,500,000, compared with \$27,500,000 in March, 1930, the net position remained unchanged.

Many may ask how the railways could manage to get along in March of this year with \$5,000,000 less of operating expenditure than in March, 1931. They may think that the railways must have been wasting a lot of money last year, or spending it unnecessarily.

The real facts, perhaps unfortunately, are quite different. In March, 1930, the number of railway employees was 145,607, with a payroll of \$19,000,000. In March, 1931, the number of employees had dropped to 124,000, the payroll declining to \$15,000,000.

Thus, while the railways saved a lot in operating costs, it was at the price of 20,000 railwaymen being dropped from employment, with a monthly loss of \$4,000,000 in purchasing power.

That, the circumstances being what they are, helped the railways. But it won't much of a help to Canadian business. The great trouble about unemployment is that it creates unemployment—Ottawa Journal.

#### Baroness Visiting Canada

#### Belgian Sportswoman Expects To Use Camera More Than Gun

Rifles, fishing rods and cameras form the main part of the equipment brought to Canada by Baroness C. N. Buffin, Belgian sportswoman and huntress, who is at home with a gun or a paddle in her hand, and who has come this year for the purpose of doing a lot of photography, perhaps getting a moose or two and fishing minklungs as much as possible.

Clear Lake is largely fed by springs and its cold waters contain several varieties of fish. Northern pike are the most abundant, but whitefish and perch are also found in numbers. Fishing is free under the Park regulations. The open season is from July 1 until September 30, and the limit for each angler is fifteen fish a day with a limit of thirty pounds. The tourist seeking fresh woods and pastures new will find that the park fulfills all the requirements of the ideal vacation, for here is a settled summer community with hotel accommodation, stores, and motor camp ground while many summer cottages front on a lake of sparkling blue water. Here, too, are opportunities for fishing, swimming, tennis, and golf, and then just beyond this front an almost virgin land where the elk and bear and moose still roam. Riding Mountain National Park is one of the great sanctuaries of wild and beautiful nature which have been set aside under the Department of the Interior as national parks for the use and enjoyment of the people of Canada and for the stranger within her gates.

On a lofty plateau, 2,200 feet above sea level, which forms the summit of Riding Mountain, covered with a luxuriant growth of forest and set with exquisitely clear lakes, lies Manitoba's great scenic playground—Riding Mountain National Park. Hundreds of elk, bear, and moose roam wild within its boundaries; wildfowl and beaver build their homes along its waterways; while a herd of buffalo, descendants of those wild herds which once roamed the prairies of Manitoba, browses on the rich buffalo grass of its uplands. Here, Manitoba, found its park ready made and for years, long before the project of a national park was mooted, it has been the summer playground of people from all parts of the province. Its easy accessibility by rail or highway, and the fact that it lies within a day's ride or less of many of the province's cities and towns, ensure it a maximum of use both by the people of Manitoba and visitors from outside the borders. Now, with adequate conservation and orderly development, it is fast becoming for increasing numbers a delightful playground—a place of rest and refreshment.

One of the greatest charms of the park from the scenic point of view is the number of beautiful little lakes which nestle between the ridges, in hollows made by the ancient gliders of the Ice Age. They are of all sizes ranging from tiny tarns to splendid bodies of water several miles long. The largest and finest of these is Clear Lake situated near the southern boundary of the park. This lovely sheet of water, nine miles long and varying in width from one mile to two and a half miles, reflects in its limpid waters the hues of both earth and sky. A nine-hole golf course is situated at the eastern end of Clear Lake, with a view to the westward down the whole blue length of its expanse.

Clear Lake is largely fed by springs and its cold waters contain several varieties of fish. Northern pike are the most abundant, but whitefish and perch are also found in numbers. Fishing is free under the Park regulations. The open season is from July 1 until September 30, and the limit for each angler is fifteen fish a day with a limit of thirty pounds. Riding Mountain National Park is one of the great sanctuaries of wild and beautiful nature which have been set aside under the Department of the Interior as national parks for the use and enjoyment of the people of Canada and for the stranger within her gates.

#### Quality Increases Sales

An increase of over 2,000,000 lbs., representing some 3,625 head of beef cattle, for the first four months of the present year is indicated in the latest issue of the Live Stock and Meat Trade Review prepared by the Markets Intelligence Service of the Dominion Live Stock Branch. Sales for the first four months of 1931 totalled 5,032,396 lbs., while for the corresponding period in 1932 they totalled 7,047,365 lbs.

#### Measuring Star's Brightness

With a photo-electric photometer such as the one attached to the telescope at the Dominion Observatory, Department of the Interior, Ottawa, it is possible to measure the brightness of a star to within one half of one per cent of its value. This instrument is used mainly for following the changes in the brightness of variable stars.

There was a substantial gain in the Prairie Provinces wool clip last year. Alberta clipped 4,554,000 lbs., Saskatchewan, 1,605,000 lbs., and Manitoba, 1,202,000 lbs. Total 7,361,000 lbs.

"My wife is always shrieking with pains."

"Have you no remedy for it?"

"Rather! I stop my ears with cotton wool!"—Karlikature, Oslo.

W. N. U. 44

WORLD HAPPENINGS  
BRIEFLY TOLD

James W. Douglas, Edmonton, has been appointed stipendiary magistrate for the Northwest Territories.

Lady Eaton of Toronto, back in Canada after an extended visit abroad, told an interviewer in Winnipeg that Canada is doing too much worrying about the depression.

New York motorists paid approximately \$3,000,000 during the past decade to run red lights, talk back to motorcycle cops and drive the wrong direction on one-way streets.

An issue of the Canada Gazette contains a proclamation designating the Waterton Lakes National Park as a part of the Waterton-Glacier International Peace Park.

Canada stands third in the public ownership of railways. India is first with 41,724 miles of road. Germany second, with 32,400, and Canada, 24,822, including federal, provincial and municipal.

Atlantic salmon eggs are being exchanged with the state of California by Dominion authorities for a corresponding number of steelhead salmon eggs to be used in stocking British Columbia waters.

One hundred years ago in June, 1832, the Dominion of Canada extended the rights of citizenship to the Jews of the country. Jews all over the Dominion celebrated the centenary of emancipation.

The British gunboat "Moore" was bombed by mistake by Chinese aeroplanes sent by General Chen Chai-Tong to recover a quantity of munitions captured by Admiral Chen Chak, rebel commander of the Chinese navy, but she was not struck.

Union Drilling Company of Calgary will commence drilling for crude oil in the heart of Alberta's "bad lands" where dinosaurs roamed millions of years ago. Vancouver capital is backing the venture and W. D. Marler, of Vancouver, is heading the company seeking crude oil.

While screening gravel at the Hudson Bay railway yards at Churchill, George McDonald, machinist, found an old coin of the reign of George the Third. The coin is thin, and somewhat worn. The gravel from which the coin was taken, came from the shore of the bay. It is presumed it was lost by a sailor of one of the early expeditions.

## Salvaging Lost Gold

Divers Are Bringing Up Ingots From Sunken Liner

Brest, France.—Thirty ingots of gold, valued at \$1,000,000, were stowed away in the hold of the salvage ship "Artiglio II," as divers, with renewed vigor, dropped into the sea to fish up the rest of the \$5,000,000 which went down with the liner "Egypt" ten years ago.

The \$1,000,000 which was clumped down on the "Artiglio's" deck represents four years of dogged labor against the power of the storms and sea. Two stout ships have been lost in the quest and the lives of 15 seamen.

The tragedy of the past was mirrored in the dramatic scenes on the "Artiglio's" deck when the ingots were brought up. There was a moment of silence in honor of the divers who were killed two years ago in the explosion which destroyed the "Artiglio I."

Paris, France.—The French salvage company, which first discovered the location of the hull of the liner, "Egypt," from which \$1,000,000 has been recovered by the salvage ship "Artiglio II," will claim part of the booty. Captain Jean Davy said in an interview with Paris-Midi, Paris newspaper.

A firm of shipowners wired one of their captains: "Move heaven and earth; get her on Friday."

Just as they were becoming very anxious they got the reply: "Raised her, and arriving Thursday."

Rope or cord can now be made weatherproof by a British process of impregnating it with rubber.

  
"My brother lost his sight through drink."  
"It serves me the other way—I see double."—Gutierrez, Madrid.

W. N. U. 1940

## More Prevalent In Cities

Common Cold Flourishes Best In Crowded Centres  
That colds are associated with crowded cities public health officials have long suspected. Dr. Wilson G. Smillie of Harvard now supplies the supporting evidence. In four isolated communities colds are caught only from outsiders. Spitzbergen's case is especially impressive. The miners of that most northerly community live and sleep in damp, hot barracks, work in drafts at temperatures below freezing, but catch no cold. When Dr. Smillie concludes that the common cold must be attributed to an infection and probably to one that can never be seen under the microscope we naturally ask if there is no serum that will impair immunity. He holds out no hope. Only the secondary infections may perhaps be thus controlled. The primary cold seems to be unconquerable—the price we pay for swarming in cities.

## A Perpetual Memorial

late John Weller Superintended Work On Welland Ship Canal  
John Lang Weller is dead, but the Welland Ship Canal will be a perpetual memorial to his work. Few Canadians were familiar even with the name of the man who was in charge of the construction of the greatest public work ever completed in the Dominion of Canada. Yet it was Mr. Weller who was on the job; it was he who was head of the surveys, designs and carrying out of the big task from 1912 to 1917. When work was resumed in 1919 after the war, it was Mr. Weller who was made consulting engineer. For the last few years he has been on pension from the Federal Government.

**Winnipeg Newspaper Union**  

  
519  
SLIMMING, GRACEFUL AND YOUTHFUL WITH BECOMING LY PLACED CAPELET  
FRILL  
Here's a delightful model, full or charm for summery wear.  
A capelet will cover the sleeves and the midriff admirably. And don't you think the skirt is smart with its slimming hip lines?

To make it! Cut it out and you'll wait in less time than it would take to shop for one that is as smart as this.

It is carried out in triple sheer print. Tab slits in white or pastel, voile prints, sheer dotted batiste and sheer prints are dainty and cool suggestions.

Style No. 519 is designed for sizes 14, 16, 18, 20, 22, 24 and 26 inches bust. Size 16 requires 3 1/2 yards of 39-inch material.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

"Yes—but what if you fall on your head?"—Rix in Review of Reviews.

## Contract Bridge

By Hamilton B. Hatch, Cavendish Club, Toronto

In my previous article the methods of valuing the trick taking probabilities of hands were given. Today I will deal with the application of these principles.

It must be understood that in Contract it is the endeavor of the partnership in any particular deal, to tell as precisely and as definitely as possible the story of the twenty-six tricks held by the partnership. For this reason, certain basic conventions are necessary and also certain definite formulas for card valuations. Both of these have been outlined in previous articles.

The opening bidder, under ordinary circumstances, opens the bidding when his hand contains three or four high honor cards which, he thinks, under average conditions, will take from two to three tricks in any declaration the adversaries may make. Also the opening bidder guarantees, that, in case he and his partner are the declarers the bidding hand will take as a minimum, from four to five tricks, if the deal is played in the original declaration made. That therefore there are nine tricks left for the three remaining hands, and that the opening bidder expects his partner to have at least three of these. Therefore when an opening bid of one is made normal expectancy by the opening bidder is three taking tricks in the declared suit. In his partner's hand. These three taking tricks are made up of the three kinds of tricks i.e. High card tricks, long suit tricks and ruffing tricks.

It must be borne in mind that, in Contract, provided there is no interference bidding, the first response by the partner of the original bidder is the vital response. In other words it is upon the first response that the success or non-success of that particular deal depends. It is, therefore, of the utmost importance that this first response be precise. In any raise by the partner of the original bidder's declaration, the raise must be given in full. As normal expectancy is three taking tricks, the full raise is the number of tricks above three that the hand contains. This works out as follows:—The original bid is one spade. This bid definitely informs the partnership that the bidding hand contains a minimum of four to five taking tricks with spades trumps. The original bidder's partner decides that the spade bid fits his hand and that the deal should be played with spades trumps. The responding hand then figures the actual trick taking probabilities of the hand with spades trumps. If the hand will take four tricks, then he raises the bid to two spades. If the hand will take five tricks he bids three spades and so on.

In other words he gives raises corresponding to the number of taking tricks he has above three. The following example will explain this.

North  
Spades X. X. X. X.  
Hearts X. X. X. X.  
Diamonds A. X. X. X.  
Clubs K. X. X. X.

South  
Spades A. X. X. X.  
1 cupful sugar.  
1/4 teaspoonful almond extract.  
1/4 cupful coconut.  
2 cupfuls rice flakes.  
1/4 cupful nut meats (chopped).  
Pinch of salt.

Beat the egg whites until stiff, add the sugar gradually, then add the almond extract, coconut, rice flakes, salt and nut meats. Drop by spoonfuls on a buttered pan and bake in a moderate oven ten minutes, or until the macaroons are a delicate brown.

There is wide spread interest in the Island Lake district, Manitoba, on the part of mining men in all parts of Canada. Over 650 reports on this district were recently sent out by the Manitoba Chamber of Mines.

The active search for oil in western Canada has switched to Northern Alberta, where three test wells are planned in the Athabasca area, by Eastern interests.

West East

Diamonds X. X. X.

Clubs X. X. X.

The Bidding.—South is the Opening Bidder

S W N E

1 Spade Pass 3 Spades Pass

4 Spades Pass Pass

In valuing North's hand the procedure is as follows:—

Half a trick for the four card spade suit.

Half a trick for the Jack of Spades.

One trick for the ability to ruff the third round of hearts.

"It is necessary to abolish all officials!"

"Yes, especially magistrates. One of them has sentenced me three times!"—Pele Mele, Paris.

## SUNDAY SCHOOL LESSON

JULY 10

## THE CALL OF MOSES

Golden Text: "Certainly I will be with thee."—Exodus 3:12.

Lesson: Exodus 2:11 to 4:20.

Devotional Reading: Isaiah 6:1-8.

Explanations and Comments

Called To a Great Task, Exodus 3:10.—"The biography of great men is not confined to public events. It relates the incidents which are private, and describes the experiences which are personal and not for general results. Thus it was with Moses; we must be with him in the wilderness in order to understand his conduct at the head of the host of Israel. At first he was called to go to Egypt to comfort the leader of his people, deliver them from oppression in Egypt, and bring them forth on their way to the Promised Land. He stood before a bush that burned and yet was not consumed."

"How clear is the anticipation here of what is now the accepted truth of physical science, that the energy of God, though always expended in natural law, is never consumed and never destroyed!"

"I have seen the affliction of my people . . . I am come down to deliver them. Come now therefore, and let me send you to Pharaoh, that you may bring forth my people, the children of Israel out of Egypt."

"With a flash of insight Moses knew that God was calling him to the stupendous task of delivering his enslaved people from Egypt."

"The dialogue between Jehovah and Moses, as in other cases, must be pictured, not as one audible externally, but as giving expression—in words which are natural to them of that nation." Moses' mental surroundings with God, through which he was gradually taught by him that he was before him, he was nevertheless to be God's appointed messenger for bringing Israel to God's deliverance."—S. R. Driver.

"God has a way of His own into the spirit which He has made. He lays His will upon man, and the man wakes to the realization that he stands summoned by that being to specific submission and definite service."

"And as the path of duty is made plain, My grace be given that I may walk therein, Not like the hireling for his selfish gain, But cheerful in the light around me, Walking as one to pleasant service led, Doing God's will as if it were my own, Yet trusting not in me, but in His strength alone."

—Whittier.

## Body Emits Violet Rays

Rays From Woman's Eye Destroy Yeast Cells

A woman's eye killed yeast cells simply by looking at them at Cornell University recently. This discovery, suggesting the "evil eye," but found due to an ordinarily harmless form of ultra violet rays given off by human bodies generally was reported to the American Association for the advancement of science.

The experiments were described by Dr. Otto Rahn, of the Cornell Bacteriology Department.

The yeast cells—a tiny particle—were laid on a glass slide. The woman placed her eye close, as in looking through a microscope. The cells died in a few minutes. Previous experiments with other parts of the body explain the lethal power in this feminine look.

For several years scientists have been reporting various discoveries that living things produce ultra violet rays. In the human body they were first found coming from working muscles, though not from resting ones. Then they were found in the blood and in carcinoma, a form of cancer.

The finger tip rays of several persons at Cornell killed yeast readily. Through quartz placed above the eyes, the killing required about 15 minutes; without it two to five minutes. The quartz helped to show that ultra violet rays given off by human bodies are a delicate brown.

After the finger tip of the nose was discovered to be a fine ultra violet "tube." Then came the eye.

The human rays are not always harmful. From some persons they are beneficial to tiny plants. There seems to be no difference in the kind but the volume differs. When large it is lethal to yeast. The same person emits it at different rates. He may be "killing" at one period and "benign" at another.

## Mrs. Adam Ate Apple

It wasn't Eve who ate the Biblical apple in the Garden of Eden. It was Mrs. Adam, Dr. H. A. Ironsides, Chicago, explained in a lecture at Fort Worth, Texas. The name Eve was conferred on her later, by Adam himself.

An Ontario farmer gave a barber two dozen eggs for a haircut. A good sport would have thrown in an egg shampoo.

## What Price Accidents?

Burden Of Cost Falls On Just and Unjust Allie

The average citizen when he picks up the paper and reads about an automobile accident may feel a fleeting moment of sympathy for the victim, but he dismisses the incident from his mind as something that does not concern him personally. If he stopped to think, he would realize that every automobile accident involving injury or loss of life affects his pocketbook. Nearly every such accident calls for emergency hospitalization and this in its turn costs money.

To this cost must be added the expense of automatic signals, court and traffic squads, insurance rates also increase. So that any way one figures the matter out the burden of such accidents falls upon the just and the unjust alike.

In the year 1931 there were some 3,000,000 automobile accidents in the United States, with 1,000,000 people killed or injured. This is too appalling to even comment upon. The destruction of life and property in the end touches everybody's pocketbook much more than the cost which the accidents involve. The sum total of all these charges should be great enough to make the people of the United States bend every effort to reduce automobile hazard.

The remedy lies solely with the people themselves.—Argonaut, San Francisco.

## Binder Twine Shipments

Eighty Million Pounds to Be Handled Over Lake Head Dock

Binder twine to the amount of approximately 80,000,000 pounds will be handled over the docks of Fort William and Fort Arthur ports this year to meet the requirements of western Canada, where grain fields are expected to produce one of the biggest crops in history.

Already twine by the thousands of bales is finding its way up the lakes to the twin ports to be unloaded and transshipped by rail to scores of distributing agencies throughout the three prairie provinces.

Twine that will tip up Canada's 1932 crop is coming from the mills of the International Harvester company, the Plymouth Cordage company and from Dutch mills in Rotterdam. Much of it will be unloaded at and shipped west from the transfer houses of the first two companies, but millions of pounds will pass through the C.P.R. and C.N.R. freight sheds, the whole operation providing employment for hundreds of stevedores during the summer months.

## Would Share Profits

Alberta Urban Municipalities Want Portion of Taxes Levied by Province

Alberta urban municipalities believe they are entitled to a share of provincial income levies, gasoline tax and liquor profits. A resolution passed at the closing session of the annual union of Alberta municipalities asked the government for a part of these returns.

The resolution was passed following an address by Premier John Brownlee in which he declared a request for a share in provincial revenues would be of no avail under present conditions.

Mayor J. Bullivant, of Medicine Hat, was elected president of the association for the coming year and Calgary was chosen for the 1933 convention.

Englehardt—"Why don't you make fun of my countrymen just as you made fun of your own?"

Scot—"Well, man, it's bad enough being an Englishman without making a joke of it."

Great men had good mothers, but all good mothers had great sons, what a world this would be!

"Have you heard from your son in America?"

"No, but I have heard that he has risen in the world."

"What? Have they hanged him?"—Viking, Oslo.

## "YES, I AM 40 YEARS OLD!"

says Irene Rich

"YES, I am 40 years old," she says Irene Rich, "and I have two granddaughters of whom I am very proud. A screen star never worries about birthday, know."

But, in Hollywood, they guard complexion, beauty above all else. They know it says youth quicker than anything else.

How does this lovely star guard complexion beauty? Just as so many other Hollywood girls do—by the 694 important ones! "I have used Lux Toilet Soap regularly for years," she says, "and am very grateful for it."

Since you'll want to try this fragrance, white soap. The cans of dollar-a-can French soap for 10c!

IRENE RICH and her two daughters (left to right) Jean, 16, and Jane, 13, in background. Fifteen, the mother, actually 40! (above). One of Miss Rich's recent photographs.

## THE HOUSE OF DREAMS-COME-TRUE

—BY—

MARGARET PEDLER

Author Of  
"The Splendid Four," "The Herald  
Of The End," London.  
Hodder & Stoughton, Ltd., London.

CHAPTER XXIV.—Continued.

Once more the curtain had fallen, and to the hum of conversation suddenly released, the lights flashed up into being again over the auditorium. Simultaneously the door of Lady Anne's box was opened from the corridor outside.

"May I come in?" said a voice—a pleasant voice with a gay inflection of laughter running through it as though its owner were quite sure of his welcome—and Burke, big and striking-looking in his immaculate evening kit, his ruddy hair flaming wickedly under the electric lights, strode into the Comtesse de Varigny.

He shook hands all round, his glance slightly quizzical as it met Jean's, and then Lady Anne presented him to the Comtesse de Varigny.

It almost seemed as though something, some mutual recognition of a kindred spirit, flashed from the warm southern-dark eyes to the fiery red-brown ones, and when, a minute or two later, Burke established himself in the seat next to Jean, vacated by Nick, he murmured in a low tone:

"Where did you find that Eastern-looking charmer? I feel convinced I could move my heart to her without any effort."

Jean could hardly refrain from smiling. This was her first meeting with Burke since the occasion of the scene which had occurred between them in the little parlour at the "honeymooners' inn," and now he met, roguish, arrogant, as though nothing in the world, other than of a mutually pleasing and amicable nature, had taken place. It was so exactly like Burke, she reflected helplessly.

"Then you had better go and make love to her," she suggested. "There happens to be a husband in the background—a little hypochondriac with quite charming manners—but I don't suppose you would consider that any obstacle."

"None," retorted Burke placidly. "I'm quite certain she can't be in love with him. Her taste would be more—robust, I should say. Where is she stopping?"

"At Claridge's. We met her there

this evening. I knew her in Switzerland."

"Well, you shall all come out to supper with me tomorrow—the Countess included."

Jean shook her head demurely.

"We shall all be back at Staple tomorrow—the Countess excepted. You can take her."

"Then the supper must be tonight," replied Burke serenely.

"What are you doing in town, anyway?" asked Jean. "Is Judith with you?"

"No. Came up to see my tailor"—laconically.

He crossed the box to arrange matters with Lady Anne, and before the curtain rose on the last act it was settled that they should all have supper together after the play.

Later, when Burke had once more resumed his seat next Jean, Madame de Varigny, whose hearing, like her other senses, was preternaturally acute, caught a whisper breathed into Nick's ear by Lady Anne.

"Now isn't that provoking, Nick darling? Why on earth need Geoffrey Burke have turned up in town on our last evening? I was hoping, later on, that you and I were very discreet and effected ourselves—that Blaist and Jean might settle things."

Madame de Varigny's eyes remained fixed upon the stage. There was no change in their expression to indicate that Lady Anne's plaintive murmur had at that moment supplied her with the key of the whole situation as it lay between Jean and the two men who were sitting one each side of her.

But the following evening, when the Staple party having left town, she and Burke were dining alone together at a little restaurant in Soho, the knowledge she had gleaned bore fruit.

Burke never quite knew what impulse it was that had prompted him as he made his farewells after the supper-party, to murmur in Madame de Varigny's ear, "Dine with me tomorrow night." It was as though the dark compelling eyes had spoken to him compellingly his own sort of friendly overture which the shyness of his acquaintance with their owner would not normally have inspired.

It was not until the coffee and cigarette stage of the little dinner had been reached that Madame de Varigny suddenly shot her dart.

"So you come all the way up from this place, Coombe—Coombe Eave!—to see Mees Peterson, and hey, presto! She vanish the next morning!"

Burke stared at her, almost rudely. The woman's perspicacity annoyed him.

"I came up to see my tailor," he replied curtly.

"Mals parfaitement!" she laughed low, melodious laughter, tinged with a frank friendliness of amusement which somehow smoothed away Burke's annoyance at her shrewd summing up of the situation. "To see your tailor, 'Naturellement'! But you were not sorry to encounter Mees Peterson also, hein? You enjoyed that?"

Burke's eyes gleamed at her. "Do you think a dog enjoys looking at the bone that's been off reach?" he said bluntly.

"And is Mees Peterson, then, out of your reach? Me, I do not think so," he said.

Burke was moved to sudden colour. "She might not be, if it were not that there is another man—"

"Ce Monsieur 'Tor-ma-rin'?"

"Yes, confound him!"

"We'll—with a long-drawn-infection compact of gentle irony, 'You should be able to win against this Monsieur Tor-ma-rin. I think,' regarding him intently—"I think you will, win."

Burke shook his head gloomily.

"He had first innings. He met her abroad somewhere—rescued her in the snow or something. That resounding stink always pays with a woman. All I did!"—with a short, harsh laugh—"was nearly to break her neck for her out driving with me one day recently!"

"Is she engaged to Monsieur Tor-ma-rin?" asked Madame de Varigny quickly.

"No. Luckily, there's some old affair in the past holds him back."

She nodded. "You shall marry her," she de-

clared with conviction. "See, Monsieur Burke—" "ale, ale, quel nom!" —I am "clairvoyante, propheteuse," and I tell you that you will marry this little brown Jean."

Her foreign accent strengthened with her increasing emphasis.

Burke looked dubious. "I'm afraid your clairvoyance will fail this journey, madame. She'll probably marry Tormarin—unless—his eyes glinting—"I carry her off by force!"

Madame de Varigny shook her head emphatically.

"But no! I do not see it like that. 'Eh bien!' If she becomes fiancée—engaged to him—you shall come to me, and I will tell you how to make sure that she shall not marry him."

"Tell me now!"

"Non, non! Win her your own way. Only if you do not succeed, if Monsieur Tormarin wins her—why, then, come to visit me at Chateau Varigny."

That night a letter written in the Comtesse de Varigny's flowing foreign handwriting sped on its way to France.

"Matters work towards completion," it ran. "My visit here has changed 'bien a propos.' There is another who would be lover beside Blaist Tormarin. I have urged him on to win her if he can, for if I have not wrongly estimated Monsieur Tormarin—and I do not think I have—he is of the type to become deeply in love and less able to master his feelings if he realizes that he has a rival. At present he refrains from declaring himself. The opposition of a rival will probably drive him into a declaration very speedily. When the dog sees the bone to be taken from him—he snaps! So I encourage this red-headed lion of a man, Monsieur Burke, to pursue his 'affaire du coeur' with vigour. For if Blaist Tormarin becomes actually betrothed to Mademoiselle Peterson, it will make his punishment the more complete. I pray the God of Justice that I may not now be long delayed!"

(To Be Continued.)

### A Remarkable Cure

Crippled Girl's Arm and Legs "Rebuilt" By Noted Surgeon

After two years in hospital, complete cure is in sight for Pearl Penny, a pretty girl of 18, crippled for 13 years by infantile paralysis, which left her with twisted legs and a crooked right arm. Her limbs have been "rebuilt" by a noted surgeon.

Bones were taken from various parts of the body and used to reinforce and build up ankles twisted away from years of hobbling about on crutches. Gradually her legs were made straight and shapely. Her right hand was practically useless, but a long incision was made in the wrist and a muscle taken out and placed in the hand to make the thumb and fingers work.

Incisions made in various parts of the body made 250 stitches necessary. The patient can now stand on her feet unaided, and after her next operation it is hoped that she will be able to enjoy life like any other normal girl.

### An Effective Device

Discharges Gas From Pistol and Reload Victim Unconscious

An attachment for an ordinary pistol by which a victim may be rendered unconscious without suffering permanent injury is being tested by the Paris police. A cone-shaped chamber containing gas is fitted over the muzzle of the revolver, which is loaded with blank cartridges. When a cartridge explodes it throws a blast of the gas for a distance of about ten feet. Any one inhaling this gas becomes unconscious for ten minutes and remains blind for an additional ten minutes after recovering consciousness. This weapon was invented by a French named Professor Drou. He believes that it will be of great aid to the police in quelling riots, and claims that it will be a more effective tool for putting down disturbances than any of the devices now used by the authorities.

### Old Portrait Found

Is Supposed to Be Picture of William Shakespeare

A supposed Shakespeare portrait, said by some experts to have been painted by Richard Burbridge, has been found in a County Cork mansion. The portrait 10 by 12 inches, has been for generations in the same family. The owners thought it was a painting of Sir Walter Raleigh. Authorities who have inspected it say that Burbridge, one of Shakespeare's fellow actors, painted it when Shakespeare was 38 years old. It is on an oak panel and in a good state of preservation.

In Saskatoon, south of approximately latitude 63, enough food is produced to support a population of 40,000 people.

You said it!  
it pays to  
"ROLL  
YOUR  
OWN" with..

Thousands of delighted smokers say it because they have proved it, time and time again.

You can roll at least 50 cigarettes with a 20c. package of Turret Fine Cut cigarette tobacco.

And every cigarette you roll will be to your liking. The more you roll, the more you'll enjoy them.

15¢ and 20¢ packages  
—also in 1/2 lb. vacuum tins

FREE Chantecleer Cigarette Papers with every package.

**TURRET**  
**FINE CUT**  
Cigarette Tobacco

### Sell Canadian Tobacco

Canadian Smoking Tobacco and Cigarettes Have Invaded England

There is special interest in the following item which appears in the current issue of the "Economic Annals," official organ of the Agricultural Economics Branch of the Dominion Department of Agriculture:

"Brands of smoking tobacco and cigarettes made wholly of Canadian grown tobacco were introduced in Great Britain during 1931 and have met with a very fair measure of success. Canadian manufacturers were the first to offer a Canadian pipe tobacco and very recently a cigarette made entirely of Canadian bright leaf has been placed on the market.

### Rich Gold Strike

Two Prospectors Find Wealth In Nuka Bay, Alaska

Reports of a fresh gold strike in the Nuka Bay district, 60 miles southwest of Seward, Alaska, were brought in by two prospectors who displayed a fifteen-pound sample of gold quartz estimated to assay \$50,000 a ton.

The strike was made by Dave Downey and Tom Babcock, and the specimen was declared by veteran prospectors to be the richest ever taken from the district.

**All Night With Asthma** Everyone knows how attacks of asthma often keep their victims awake the whole night long. Morning finds him wholly unfitted for a day of business, and his business must still be carried through the day. Suffering from lack of rest can be avoided by the prompt use of Dr. J. D. Kellogg's Asthma Remedy, which positively drives away the attacks.

### Forecast Big Crop

The Lethbridge Herald says forecasters are already putting the Alberta wheat crop this year at 150,000,000. It's a long way to August 20, when cutting may be expected to commence, and many things may happen. However, if the price outlook were as bright as the yield prospects we would all be happy.

The cheapness of Mother Graves' Worm Externalator puts it within reach of all, and it can be got at any druggist's.

### Not a Bad Definition

Robert Quillen in his private newspaper which he publishes "for his own amusement and the entertainment of his friends" defines "Radio" thus: "his friends" defines "Radio" thus: "An expensive instrument you place in your home so some ass can talk to you about toothpaste."

Japan imports about 1,500,000 tons of rice every year.

A new oil refinery, costing \$25,000, is to be built at Saskatoon this year.

### Little Helps For This Week

"It is God that girdeth me with strength, and maketh my way perfect."—Psalms viii, 32.

Even as a nurse, whose child's imper- fect pace

Can hardly lead his foot from place to place, Leaves her fond kissing, sets him down to go, Nor can she uphold him for a step or two;

But when she finds that he begins to fall, She holds him up and kisses him again; So God from man sometimes withdraws His hand

Awhile to test His infant faith to stand; But when He sees his feeble strength begin to fail, He gently takes him up again.—Quarles.

When the babe puts his little soft hand into yours, his hand is as strong as yours, since it is yours that guides it; so, when we put our hand into God's, we are by His grace as strong as He is, since He, since His, and we only follow.—Henry Ward Beecher.

### Great Bear Lake Mining Begins

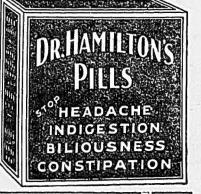

Mining President Is Enthusiastic With the Possibilities

Great blocks of silver, tons of pitchblende and eggs at \$150 a dozen, are some of the things to greet a visitor to the Great Bear Lake region. Enthused with the great mining possibilities in the far northern field, John Michaels, president of the Contact Lake Mining Company, returned by air to Edmonton recently. He was accompanied by Walter Hale, district inspector.

Keep your stock free from blemish with Douglas' Egyptian Liniment. Removes inflammation, quickly relieves bruises, sprains, strains, swellings, contraction of cords, stiffness of joints, and sore muscles.

The words "with my worldly goods I thee endow" have vanished from the American Methodist marriage service, following the example of the goods themselves.

A \$250,000 hotel is being built at Edmonton, Alberta.

## Troubled With Her Children Having Summer Complaint

Mrs. L. E. Montgomery, Ave. K, Saskatoon, Sask., writes:—"I am the mother of two children and have a great deal of trouble with them having summer complaint, in fact, several times every summer they were subject to attacks."

Dr. Fowler's Extract of Wild Strawberry is the most effective remedy and keep it always handy and give it immediately on the first sign of any bowel complaint."

"Thanks to 'Dr. Fowler's' I no longer dread the summer months."

**The Chinook Advance**

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered as Post Office second class mail matter.

All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

The Advance rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada.

The transient advertising rates in The advance are display, 40¢ per inch for first week and 30¢ for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10¢ per cent line for first week and 15¢ for each succeeding week. Cards of thanks, \$1.00.

The Advance is a member of the Canadian Weekly Newspapers Association and the Alberta Weekly Newspapers Association, and observes the prices and conditions of these organizations.

**Pioneer Passes Away**

On Wednesday afternoon, June 22, Mr. George Rogers, while working on his land, fell from his plow suffering from a stroke of paralysis just as he was quitting for the day and was found by his wife lying unconscious on the ground.

Mr. Roger had not been in good health for twenty years and this was the culmination of his affliction. He was taken to the house where he lay for four days in a comatose condition and on Monday morning quietly passed to the Great Beyond. He never spoke and did not know those about him.

The deceased came here in an early day and homesteaded where he farmed up to the time of his death. He leaves a wife and two children, Merl Rogers and Mrs. Meredith McColl of Stettler, both of whom were at the bedside of their father. The funeral was planned for Tuesday at the home, but as the last news letter for the Recorder must leave Cereal on Monday night, the particulars will not be published until next week.—Cereal Recorder

**Don't Give Up  
Till Tomorrow**

Oh, don't give up if they turn you down,  
Don't say die till you're dying,  
Don't turn away with a weary frown

But try, and keep on trying.

Don't sit down if they won't let you ride;

Don't say slide, till you're sliding.

If you hold up your chin and master a grin  
The trouble that's hid will keep hiding.

It's hard to grin without pennies to spin,  
When you've nothing but holes in your pocket.

For, although there's a bank you've nothing to thank  
If you haven't a key to unlock it.

But the hours of the night seem darkest at dawn,  
So perhaps some day you can borrow;

If you whistle a song when the wind's blowing wrong,  
You'll never give up till tomorrow.

**Verdict of Suicide Rendered**

Cereal, June 30.—Dr. Ester, coroner, and a jury, inquired Tuesday afternoon into the cause of death of Clarence Gray, found dead in bed on the farm of Dan Sutherland, Tuesday morning, June 21. Six witnesses were examined, including Dr. Dick, who performed the autopsy. The report of the provincial analyst stated that more than one grain of strichine was found in deceased's stomach, also that strichine and Epsom salts were in a cup found beside the body.

It was established that Clarence Gray had intended to kill himself on the Saturday night before his death.

The jury returned the verdict that Clarence Gray came to his death from strichine poisoning, self administered.

**Grasshoppers Cause Loss in Alberta Fields**

Ottawa—The cutworm menace to the western grain fields is over, but the critical period has been reached in the grasshopper campaign. The Dominion statistics have made public telegrams from the entomological laboratories watching the situation.

From Lethbridge, the report states: "Cutworm damage over for the season. 'Hoppers causing considerable worry and some losses at Granum, Carmangay, Champion, Barons, Nobleford, Diamond City, Turin, Lomond, Enchant, Travers, Rielaw, Chin, Faber, Burdett, Bow Island, Wimniford, New Dayton and Milk River. Poisoned bait being used extensively. Beet web worm causing some garden losses, and requiring attention in sugar beet fields."

The Hail Insurance Board of Alberta wires as follows:

"Hail reported from Red Deer and points west. Little damage near Olds, Drumheller and Stanmore."

**Two Hurt in Hanna Crash**

Hanna, July 2.—Jack Duff, of Hanna, is in the local hospital with severe internal injuries and T. Shoultice, of Hanna, has three ribs broken as a result of a collision on Fourth Avenue and Main street of cars driven by Arthur Colbot, of St. John's, and Fred Brown, of Hanna. Brown was proceeding east on Fourth avenue to the sports ground and Colbot was coming south on Main street from the hospital when the accident occurred.

Both cars were over-turned. Brown and Colbot escaped injury, both men were riding with Colbot.

Let two or more farm women foregather on the streets these days and a lively conversation immediately ensues. It is not ordinary gossip that stirs these ladies to talk, but common and uncommon worms. It seems that the gardens, shrubs, trees and every growing thing has a worm or bug after it this year, and some of these worms and beetles are total strangers in this district and are looked upon with grave suspicion. Here is a conversation which was held on the street last week:

Mr. Priestly, vice-president of the Provincial U.F.A., will address a public meeting in the community hall, Cereal, on Monday evening, July 11th, at 8 p.m. Every farmer and business man should hear him speak on Co-operative and U.F.A. matters. He will also address Co-operative Trustees and U.F.A. members in an afternoon session.

**Heard Around Town**

A. V. Youell spent Dominion Day in Calgary.

For rent — A five-roomed house cheap. Apply this office.

Mr. and Mrs. L. S. Dawson motored to Edmonton this week.

Chinook and District School Fair will be held on September 21.

Willie Thompson will do his first year's teaching in a school south of Cereal.

Messrs. P. Petersen and G. Cook paid Youngstown a business call on Tuesday.

Vincent Rideout has accepted a position as teacher at Stimson school, south of Cereal.

Miss Mae Todd has been re-engaged as teacher for the intermediary grades in the Oyen school.

Miss Bessie Seeger, daughter of P. Seeger, Kinmundy, is visiting with Mrs. H. W. Butts for two weeks.

Harry Lloyd has been busily engaged for the past week painting the residence of Mr. R. Stewart, southwest of town.

Mrs. A. Osterberg was not recovering very fast and returned to the hospital and we are pleased to state, is now improving.

Chinook celebrated the Fourth of July by the re-opening of the Chinook hotel beer parlor after a suspension of ten days.

Mr. and Mrs. Axel Lensgraf and family, of Coronation, visited for a few days at the home of the former's parents, Mr. and Mrs. H. T. Lensgraf.

Mr. and Mrs. Arthur Gosling and family, of Calgary, were registered at the Chinook hotel over the weekend. Twenty two years ago Mr. Gosling was in this district seeking a homestead.

Owing to recent heavy rains Dr. Holt has been unable to keep his Chinook dates Weather and roads permitting he will be at the hotel Thursday, July 14, and Thursday, July 28.

Messrs. George and James Aitken, sons Andrew Aitken, of Vancouver, arrived home by motor Thursday and will remain here until the harvest is finished looking after their father's farm interests.

Mr. and Mrs. J. A. Richardson have resigned their positions after having taught in the Cereal school for the past five years. Mr. Richardson has accepted a position as principal in the High school at Holden, Alta. Mrs. Richardson will take a rest from teaching for a year.

Mr. F. E. Foster, daughter, Mrs. Ed. Proctor and little son, of Black Diamond, who have been visiting for a few days at the home of Mr. and Mrs. N. F. Marcy, left by motor Sunday morning for Edmonton accompanied by Miss Irene Marcy who will attend summer school.

Second Lady—What! On my old man?

First Lady—Oh, not on my old man, but on my "Old Man" bush. Did you think my old man was wormy?—Cereal Recorder.

Chinook was well represented at Oyen's sports day held Wednesday.

Miss Mildred Milligan has secured the position as teacher at the Crystal school.

Miss Catherine Ferguson left Saturday night for Edmonton where she will attend summer school.

Miss Ina Rennie left Sunday morning for Hanna where she will visit for a time with Mrs. Harry Smith.

Mrs. Chas. Bennett is getting along quite well after having had an operation in the Cereal hospital.

Mrs. W. S. Warren, who underwent an operation for appendicitis in the Cereal hospital, is improving as well as could be expected.

Mr. and Mrs. W. A. Todd and daughter, Miss Mae, left by motor Sunday morning for Calgary and Banff where they will spend a short vacation.

Chinook, with a picked up team, failed to get in the money at Oyen's baseball tournament yesterday. In the final game Chinook and Acadia Valley divided first money, the game ending in a tie.

Leonard Youell arrived here Saturday morning and will spend the summer vacation with his father. He has been engaged to play with the Chinook hotel dance orchestra during the absence of Ted Nordin.

Last Saturday evening's dance in the ballroom of the Chinook hotel was again well attended. These dances have become a "habit" with the lovers of dancing and Saturday night appears to be eagerly looked forward to. A novelty in the form of a balloon dance will be held in the near future. Johnny DeWaere was the lucky holder of the winning ticket for the free hamper of groceries.

Mr. and Mrs. L. S. Dawson returned from their trip to Edmonton Wednesday evening.

In a letter received from New York from Capt. Peters he states that he is enjoying his vacation and wishes to be remembered to all his Chinook friends.

Mr. O. Nelson left by motor on Monday for Coonrev, Alta., where he will spend a few days with his mother, after which he will return accompanied by Mrs. Nelson and daughter, Hazel Deane who have been visiting for a month with Mrs. Nelson, sr.

At 1 o'clock Monday morning fire of unknown origin broke out in the A. L. Sellers' second hand store, Youngstown. There was a light northwest wind blowing at the time, but prompt action by the fire brigade prevented the spread of the flames and confined the fire to the building. The interior and contents of the building were hardly damaged and the loss is not expected to be heavy. It is not known if any insurance was carried.

Leaves to Control Grasshopper Station

Youngstown, July 5 N. Stetke, manager of the provincial farm at this point, left on Friday for Bow Islet, where he will assume supervision of the control of grasshoppers in the Medicine Hat district.

**John Leslie Retires**

1. John Leslie. 2. E. E. Lloyd.  
3. L. B. Unwin. 4. E. A. Leslie.

John Leslie, Vice President of Canadian Pacific Railway, after more than 53 years of service with the company, has announced his retirement, effective July 1st, according to an announcement made by E. W. Bent, Vice President and General Manager. Mr. Leslie will be succeeded by Mr. E. E. Lloyd, present Comptroller of the Company. L. B. Unwin, Assistant Comptroller, will be promoted to Comptroller.

Mr. Lloyd, who succeeds Mr. Leslie as Vice President and Treasurer, commences his railroading career in 1918, when he was appointed to the Canadian Pacific Railway in 1918. He was promoted to Comptroller in 1921, and to Assistant Comptroller in 1923. Mr. Lloyd is a son of John Leslie and followed his distinguished father into the service of the Canadian Pacific. He was born in 1887, when he became a clerk in the Stores Department. He became Auditor of the Montreal Auditorium in 1901, and after holding different posts in that department, became Auditor of Disbursements in March 1918; Auditor of the Canadian Pacific in 1921, and Comptroller in February 1923.

Mr. Unwin, who succeeds Mr. Lloyd, was born in 1891, and joined the office of the Assistant Superintendent at Chippewa, Ontario, in 1903 and served at Chippewa, White River and Schreiber until the out-

break of the world war. He early answered the call to arms by enlisting in the first Contingent. Mr. Unwin was awarded the Military Cross, being decorated with that in April, 1918. On January 1, 1923, he was made Assistant Auditor of Miscellaneous Accounts, and on February 10th, 1928, he was appointed Auditor of the Auditorium. E. A. Leslie, who becomes Deputy Comptroller is a son of John Leslie and followed his distinguished father into the service of the Canadian Pacific. He was born in 1891, and joined the Canadian Pacific in 1918. He was promoted to Comptroller in May 1919 with the rank of Lieutenant. July of the same year he joined the Canadian Pacific in the Auditorium. He was promoted to Comptroller in 1923. Mr. Leslie was promoted to the post of Assistant Comptroller in February, 1928.
